

# Series

Economy Class seat

# 6

The new Series 6 Economy Class seat is as much an expression of simplicity as Acro's current award-winning product lines.

It is a completely redesigned new generation Economy Class seat. The key innovation is that the standard aluminium tube framed seatback has been replaced with a fully composite seatback.

This leads to increased passenger comfort, a more sophisticated appearance, greater legroom, lighter weight, greater durability and increased ease of maintenance.

The seat is available in both fixed back and reclining versions and offered as standard with a high-level seatback literature holder, or with optional tablet holder integrated into the seatback.

## Key benefits

lighter than  
current  
generation

Up to  
18mm  
extra  
seat width

maximum  
angle recline

## Certifications

- ETSO/TSO C39b (9g)
- ETSO/TSO C127b (16g)
