Premium Economy seat

7

A great experience is about choice: freedom to move, a space to 'be'. We think that a journey should be as rewarding as arriving at the destination.

Introducing Series 7 – Acro's premium design experience.

When we designed our Series 7 Premium Economy seat we decided to do it the right way – as a piece of furniture – not a piece of equipment. Because when something is beautifully designed it enhances the way people feel, their experiences and the choices they make.

Good design is a way of life – Series 7 exemplifies this, using Extraspatial Design to optimise hidden dimensions; creating a seat that is beautifully simple, yet overflowing with extraordinary features.

Crafted using the finest materials, Series 7 delivers unparalleled legroom, class-leading width and full recline. It also incorporates smart design features including personal storage consoles, and an elegant single leaf table that not only enhances the experience, but also increase the space available to passengers. All of which make it the perfect travelling companion.

Understanding the needs of airlines

Acro seats exemplify the fundamental design principle of simplicity and a complete understanding of the aircraft cabin environment. Positioned in the sweet spot where comfort, robustness and weight are in perfect balance, Acro seats offer the best solution for Economy Class seating.

Acro has been designing, certifying and manufacturing Economy Class aircraft seats since 2006 and now has 80,000 flying worldwide.
